SKILLS

- **Languages:** C, C++, JavaScript, Python, Java
- **Web Technologies:** HTML, CSS
- **Frameworks:** React.js, FastAPI, Tailwind CSS, REST API
- **Libraries:** Pandas, NumPy, scikit-learn, Selenium, BeautifulSoup, Requests, JSON, Streamlit
- **Tools/Platforms:** GitHub, VS Code, Excel, Power BI, Oracle VirtualBox, Red Hat Linux, MySQL
- **Soft Skills:** Leadership, Teamwork, Dedicated, Time Management, Adaptability

PROJECTS

- **AI Trivia Bot | [GitHub](#)** Feb 25
 - Created a secure, interactive SPA using React.js and Tailwind CSS, integrating Clerk Authentication for robust identity management.
 - Assembled complex game state logic for various categories (e.g., Music, History), utilizing JSON serialization to process user answers and manage 10-question cycles.
 - Implemented external API integration to dynamically fetch quiz content and calculate real-time performance scores based on server responses.**Tech Stack:** React.js, Tailwind CSS, Clerk Authentication, REST API, JSON, JavaScript
- **Linux SA Automation | [GitHub](#)** Jun 25
 - Developed multiple Bash scripts implementing real-world sysadmin tasks such as process monitoring, user session tracking, USB event logging, and dynamic MOTD updates.
 - Automated system maintenance workflows by integrating cron jobs, log management, and udev triggers for consistent background execution.
 - Improved system observability and security through scripted detection of zombie processes, idle sessions, and unauthorized device activity.**Tech Stack:** Bash, Linux, cron, udev, systemd, procfs
- **Intelligent CPU Scheduler Simulator | [GitHub](#)** Mar 25
 - Built an interactive CPU scheduling simulator with dynamic Gantt chart visualization.
 - Simulated core OS scheduling algorithms including FCFS, SJF, Round Robin, and Priority Scheduling, computing metrics such as waiting time, turnaround time, and CPU utilization.
 - Engineered an automated algorithm comparison system that analyzes performance metrics and recommends the optimal scheduling strategy based on workload characteristics.**Tech Stack:** Python, Streamlit, Pandas, NumPy, Matplotlib / Plotly, Git, GitHub, Vercel

TRAINING

- **RHCSA Summer Training: Mastering Linux System Administration** May 25 – Jul 25

Linux System Administration (RH124 & RH134)

 - Configured essential Linux system components including users, groups, permissions, storage and boot processes following Red Hat enterprise standards.
 - Streamlined routine administrative tasks using Bash scripting, improving task efficiency and reducing manual intervention.
 - Managed services, system security, firewalls and troubleshooting workflows within Red Hat Enterprise Linux environments.**Tech Stack:** RHEL, Bash Scripting, Terminal Utilities, System Administration tools, Virtualization

CERTIFICATES

- Privacy and Security in Online Social Media | NPTEL | [Linkedin](#) Apr 25
- Red Hat System Administration (RH124) | Red Hat | [Linkedin](#) Jul 25
- Red Hat System Administration (RH134) | Red Hat | [Linkedin](#) Jul 25

EXTRA-CURRICULAR

- **Rotary Club** Jun 24 - Jul 24
 - Volunteered with Rotary Club to serve affordable meals to underprivileged communities, contributing 3 hours daily to support local hunger-relief efforts.

EDUCATION

Lovely Professional University

*Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.2***

Punjab, India

Apr 23 - Present

Swami Keshwanand Convent School

*Intermediate; **Percentage: 76%***

Sikar, Rajasthan

Apr 20 - Mar 22

MLS DAV Public School

*Matriculation; **Percentage: 96%***

Narnaul, Haryana

Apr 19 - Mar 20
